Meridian®

A readily adaptive storage solution for evolving workplaces

Meridian Storage

Meridian offers a suite of storage solutions that enhance your experience of work by keeping tools and essential items organized and close at hand. The design efficiently stores personal and work items, creates boundaries, and provides places for people to gather, while also serving, when desired, as an attractive focal point for a space.

Meridian's strength lies in its ability to evolve as an organization's needs change. Its modular elements stack up, open from either side, and can be easily interchanged to create spaces where individuals and groups have the support to do their best work, both now and in the future.

Architectural

Creatively combine Meridian storage elements to shape spaces that allow people to engage in an ideal mix of focused and collaborative activities. Stacked or standing alone, Meridian defines pathways between settings. The design also creates

boundaries between workspaces, providing the privacy necessary for individual work. Cushion-topped stationary or mobile pedestals also provide convenient guest seating.

Flexible

A Meridian configuration can simultaneously provide storage, display, boundary, and surfaces for work. Modular and reversible, Meridian quickly and easily adapts as an organization grows. Interchangeable modules are available in a variety of sizes and configurations that will efficiently accommodate both current and future storage needs. Within each unit, options for customization abound. Shelves, trays, and dividers can be configured to suit an individual or group's unique requirements.

Attractive

A robust offering of paint, laminate, and veneer finishes allows Meridian to be the center of attention or to recede into the background—whichever best complements the aesthetic of a space. It offers unlimited opportunity for decorative display and keeps necessary books, binders, and tools close at hand. Available in a variety of sizes, Meridian has numerous adjustable and customizable elements, and can be easily converted into cushion-topped seating.

Productive

Hardworking elements, including lockers, provide ample space for housing personal items, as well as the digital and analog tools shared by groups. Lockers consolidate storage away from the workspace, allowing more room for people to work,

interact, and move freely about the space. Options for wardrobes, storage units, and drawers—as well as mobility and power—add to the design's utility.

In combination with any of our workspace solutions, Meridian provides storage, boundary, and seating for settings where people can easily transition between individual and collaborative work.

Materials
